1 [Some social implications of ubiquitous wireless networks](#)

Marc A. Smith

April 2000 **ACM SIGMOBILE Mobile Computing and Communications Review**, Volume 4 Issue 2

Full text available: pdf(1.41 MB)

Additional Information: [full citation](#), [abstract](#), [index terms](#)

Wireless computer networks and the devices to communicate with them are about to become ubiquitous. A profusion of devices is likely to emerge quickly in specialized form factors, from handhelds to cheap, disposable sensors. Groups of people using these tools will gain new forms of social power, ways to organize and coordinate their interactions and exchanges just in time and just in place. Using these tools, people will be able to collectively construct a range of resources that were too diffic ...

2 [WEST: a Web browser for small terminals](#)

Staffan Björk, Lars Erik Holmquist, Johan Redström, Ivan Bretan, Rolf Danielsson, Jussi Karlgren, Kristofer Franzén

November 1999 **Proceedings of the 12th annual ACM symposium on User interface software and technology**

Full text available: pdf(173.07 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

We describe WEST, a WEB browser for Small Terminals, that aims to solve some of the problems associated with accessing web pages on hand-held devices. Through a novel combination of text reduction and focus+context visualization, users can access web pages from a very limited display environment, since the system will provide an overview of the contents of a web page even when it is too large to be displayed in its entirety. To make maximum use of the limited resources available on a typica ...

Keywords: WAP (wireless application protocol), flip zooming, focus+context visualization, hand-held devices, proxy systems, text reduction, web browser

3 [Enabling location-based applications](#)

Chatschik Bisdikian, Jim Christensen, John Davis, Maria R. Ebling, Guernsey Hunt, William Jerome, Hui Lei, Stéphane Maes, Daby Sow

July 2001 **Proceedings of the 1st international workshop on Mobile commerce**

Full text available: pdf(425.81 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

We identify a number of factors that may hinder the commercial success of location-based

applications: the concern of privacy, the need to consider context beyond location, the presence of voluminous resources, and the constrained interfaces available on mobile devices. We describe an end-to-end system architecture with integrated support to address these issues. In particular, the architecture includes a Secure Context Service that provides broad context information to applications and allow ...

4 Syndication with JML

Robert Barta, Markus Schranz

March 2000 **Proceedings of the 2000 ACM symposium on Applied computing**

Full text available:  [pdf\(777.72 KB\)](#) Additional Information: [full citation](#), [references](#), [index terms](#)

Keywords: XML, multi-target publishing, reactive databases, syndication, triggered republishing
